

MeroDokan Cafe

Restaurant POS & Kitchen Inventory ERP System

PROJECT QUOTATION

Ref No: QTN-MDK-2026-081

Date: September 16, 2026

Validity: 30 Days

Status: Proposal for Work Order

PREPARED FOR (CLIENT):

Client Name / Enterprise: The Local Cafe
Attention: The Management / Owner
Location: Vajra World Gangtok
Contact: 96410000440
Project: Cafe POS, Table Management & Inventory ERP

PREPARED BY (DEVELOPER / VENDOR):

Solution Provider: BD Tech Software Solutions
Lead Solutions Architect: Technical Development Team
Platform: Desktop & On-Premise Cloud Hybrid ERP
Email / Web: merodokancare@gmail.com | +91-9797606232
Delivery Mode: Complete Turnkey Implementation

1. Executive Summary & Project Overview

Purpose-built automation for modern high-volume cafes, bakeries & restaurants

MeroDokan Cafe is an enterprise-grade, ultra-responsive Restaurant Point of Sale (POS) and Kitchen Inventory ERP system engineered specifically for high-speed counter service, fine dine-in operations, and real-time raw material cost control. Designed with an Offline-First Architecture, the system ensures zero operational downtime during internet or network outages, with instant thermal receipt generation, multi-station KOT routing, and complete daily raw ingredient audit reconciliation.

- ⚡ **High-Speed Touch POS & Billing:** Rapid table billing, split payments, multi-tender settlement (Cash, Phonepay/QR, Cards, Credit/Khata), discount rules, and customized thermal receipts (80mm / 58mm).
- 🪑 **Interactive Visual Floor & Table Management:** Real-time visual table statuses (Available, Occupied, Billed, Reserved) across multiple sections (Dine-in, Take Away, Delivery, Waiting) with quick table transfers and merge orders.
- 👨‍🍳 **Kitchen Order Tickets (KOT) & Section Routing:** Instant automated KOT dispatching to designated preparation stations (Kitchen, Barista Counter, Bakery) with live preparation timer tracking.
- 📦 **Cafe Raw Material Stock & Daily Usage Hub:** End-to-end recipe/ingredient tracking, inward delivery GRN recording, daily kitchen consumption logging, and automated evening kitchen stock return with strict limit verification.
- 📊 **Day-Close Cash Reconciliation & Business Intelligence:** Automated cashier shift handovers, tender breakdown audits, gross/net revenue analysis, peak-hour heatmaps, and GST tax ledger generation.

2. Comprehensive Scope of Work & Functional Modules

Itemized functional deliverables included under this turnkey implementation

■ Module 1: Interactive Floor Layout & Table Management

- Visual real-time floor plan with dynamic color codes (Green = Available, Red = Occupied, Amber = Bill Printed, Blue = Reserved).
- One-click table order initiation, running KOT display, guest count tracking, and active waiter assignment.
- Seamless table shifting, bill splitting across patrons, and table merging capabilities.

■ Module 2: High-Speed POS Billing & Multi-Tender Payment Engine

- Touchscreen and keyboard-optimized order punching with instant category filtering and quick search.
- Special item modifiers, cooking instructions (e.g., 'Extra Spicy', 'Less Sugar', 'Oat Milk'), and add-on pricing.
- Multi-tender payment handling: Cash, QR Scan, Credit/Debit Cards, Customer Ledger Khata, and Complimentary orders.
- Customizable invoice formats with cafe branding, tax breakdown (VAT / Pan / Service Charge), customer info, and custom footer greetings.

■ Module 3: Cafe Raw Material Inventory & Daily Usage Hub

- Raw Material Stock Register: Real-time unit stock balances, low-stock threshold alerts, purchase rate tracking, and asset value.
- Stock Inward Delivery (+ IN): Purchase GRN logging with Supplier database, invoice numbers, batch tracking, and transport costs.
- Daily Kitchen Usage Log (- OUT): Record raw ingredients issued to kitchen/barista with department allocation.
- 🔄 Close Kitchen / Return Stock (+ IN): Evening stock return with live table of active issued quantities, 1-click selection, and strict limit validation preventing return of unissued quantities.
- Movement Audit Ledger: Comprehensive historical ledger with multi-parameter filtering and 1-click CSV/Excel export.

■ Module 4: Day Close Settlement & Cash Drawer Audit

- Shift-wise cash register opening, cash-in/cash-out tracking, and end-of-day Z-Report closing settlement.
- Automated tender reconciliation comparing system billing totals with actual physical cash counted (Over/Short detection).
- Manager shift sign-off and tamper-evident daily financial lock.

■ Module 5: Business Intelligence, Analytics & GST Reports

- Real-time Executive Dashboard: Gross Sales, Net Revenue, Tax Collected, Discount Expense, and Average Ticket Size.
- Menu Engineering: Best-selling items, high-margin contributors, least-moving items, and peak service hour analysis.

- Raw Material Consumption Report: Reconciled Issued vs. Returned vs. Net Consumed quantities and net ingredient costs.
- Tax & Audit Reports: VAT / Pan sales registers, cancellation logs, bill reprint audit logs, and discounted order records.

■ **Module 6: Master Data Management & Security Administration**

- Complete Menu Master: Unlimited categories, menu items, variants (Regular, Large), add-on groups, and active pricing.
- Role-Based Access Control (RBAC): Distinct permissions for Administrator, Cashier, Captain/Waiter, Chef, and Storekeeper.
- Offline-first SQL Database with automated 1-click local & cloud backup utility to prevent any data loss.

3. Architecture & Hardware Compatibility

Built for high reliability, zero lag, and flexible hardware deployment

Deployment Model	Offline-First On-Premise System (Zero downtime during ISP/Internet outages)
Supported Operating Systems	Windows 10 / Windows 11 / Windows Server (Touchscreen & Desktop compatible)
POS Receipt Printers	Standard 80mm & 58mm Thermal Printers (USB, Ethernet/LAN, Wi-Fi, Bluetooth)

4. Commercial Quotation & Investment Schedule

Transparent itemized investment for software development, setup & licensing

S.N.	Description of Deliverable & Service Scope	Quantity / Unit	Amount (NPR / INR)
1	MeroDokan Cafe Core Software License • Complete POS Billing Engine & Floor/Table Visual System • Kitchen Order Ticket (KOT) & Kitchen Display routing • Day Close Settlement & Z-Report Reconciliations	1 Full Setup (Lifetime / Term)	45,000.00
2	Raw Material & Kitchen Usage ERP Hub • Ingredient Stock Register & Low Stock Alerts • Inward GRN Delivery & Supplier Ledger • Evening Kitchen Close & Return Stock Validation Module	1 Module (Integrated)	20,000.00

3	Installation, On-Site Deployment & Hardware Integration • Database configuration & thermal printer setup (Counter + KOT) • Network sharing & multi-terminal connectivity • barcode scanner integration	On-Site Deployment	10,000.00
4	Menu Master Digitization & Master Data Configuration • Entry of all food categories, menu items, recipes & add-ons • Table floor layout design and department tagging	Full Menu Digitization	5,000.00
5	Staff Onboarding & Operational Training • Hands-on training for Cashiers, Captains, Waiters & Kitchen Staff • Admin & Storekeeper management training	2 Comprehensive Sessions	5,000.00
6	1-Year Premium Warranty & Technical Support • Free software updates, bug fixes, database health checkups • Remote emergency priority support & automated backup setup	12 Months Included	Included / Free (1st Year)
TOTAL PROJECT INVESTMENT (Turnkey Implementation)			Rs. 85,000.00

(Note: Prices can be adjusted based on the client's custom currency, multi-branch licensing, or specific hardware bundle requirements).

5. Project Implementation Timeline & Milestone Schedule

Target turnaround time: 7 to 14 working days from Work Order issuance

Phase / Timeline	Key Implementation Milestones	Payment Milestone
Phase 1: Day 1 - 3	Work order confirmation, requirement freeze, database provisioning, and menu master structure setup.	30% Advance with Work Order
Phase 2: Day 4 - 8	System deployment, menu item entry, recipe formulation, KOT printer configuration, and floor layout mapping.	40% Upon Beta Deployment
Phase 3: Day 9 - 11	Hardware integration (thermal printers, cash drawer, network testing), cashier & staff training, mock billing run.	20% Upon User Acceptance (UAT)

Phase 4: Day 12 - 14

Official Go-Live in live operations, handover of admin credentials, backup scheduler activation, warranty commencement.

**10% Final Settlement
(Go-Live)**

6. Warranty, Backup Security & Support SLA

Guaranteed peace of mind with round-the-clock priority assistance

- **🛡️ Comprehensive 12-Month Free Warranty:** Includes all critical software patches, bug resolution, performance fine-tuning, and logic adjustments without additional fees.
- **⚡ High-Priority Support Response:** Critical POS/Billing downtime tickets responded within 30 minutes. General queries resolved within 4 working hours via AnyDesk/TeamViewer or on-site visit.
- **🔒 Automated Database Backup System:** Automated daily backup scheduler configured on the main terminal with secondary drive replication to ensure 100% data preservation against hardware failures.
- **🔄 Free Minor Version Upgrades:** All standard UI and feature enhancements rolled out within the warranty period are provided free of cost.

7. Standard Terms & Conditions

Governing provisions for project execution and work order issuance

7.1 Hardware procurement (Printers, Terminals, LAN Cables, Cash Drawers) shall be provided by the client, or can be supplied by the vendor as a separate hardware quotation.

7.2 Any major change requests outside the documented functional scope will be mutually evaluated with a separate change-request timeline & quote.

7.3 The software license is granted for use at the designated cafe premises with unlimited lifetime usage under on-premise local setup.

7.4 This quotation is strictly valid for 30 calendar days from the date of issuance.

8. Work Order Acceptance & Authorization

Signing below converts this quotation into a legally binding Work Order

ACCEPTED & CONFIRMED BY (CLIENT):

Authorized Signature: _____

Full Name: _____

Designation: _____

Enterprise / Cafe Seal: _____

Date of Work Order: _____

AUTHORIZED SIGNATORY (VENDOR):

Authorized Signature: _____
